

Baffles, Heat Shields and Baffle Seal Material

Cowl Saver™ Baffle Seal Material

Reduces Airframe Vibration and Stops Cowl Damage

You can feel the difference!

Baffle Seal Friction Causes Airframe Vibration and Destroys Cowl

Typical silicone rubber baffle seals have a coefficient of friction among the highest of any known material. This friction transfers engine vibration into your cowl causing fastener fretting, fatigue, cracking, chaffing and airframe vibration.

Cowl Saver™ Baffle Seal Material has 10 Times Less Friction!

- One side is silicone and the other is the revolutionary friction free surface unique to the patent pending **Cowl Saver™** baffle seal material.
- **Cowl Saver™** dramatically reduces the friction between your cowl and baffle seals.

Low Friction Saves You Money!

- Reduces transfer of damaging engine vibration to the engine cowl and airframe
- Minimizes cowl chaffing and erosion from baffle seals
- Extends baffle seal life
- Reduces expensive cowl and cowl fastener repairs
- Reduces fatigue and cracking in aluminum baffles and cowl skins
- The cowling even goes on easier!

Unbeatable Performance

- Ideal balance of flexibility and stiffness
- Fiberglass reinforced
- Meets industry standard AMS3320G
- McFarlane quality you can count on!

Part Number	Thickness	Size
CS085X3G	.085 in	3 in wide, Sold by the Foot
CS085X18X36G	.085 in	18 in X 36 in (3 ft)
CS085X36X36G	.085 in	36 in X 36 in (3 ft)
CS085X3X108G	.085 in	3 in X 108 in (9 ft)
CS085X3X156G	.085 in	3 in X 156 in (13 ft)
Color: Gray		

Convenient Baffle Seal Repair Kits

Part Number BAFFLE-KIT-1

- (1) 3 in X 108 in (9ft) **Cowl Saver™**
(Part number CS085X3X108G)
- (1) Baffle Seal Rivet Kit
(Part number RIVET-KIT-2)
- (5) Baffle Seal Retainer Strips
(Part number 6036)

Best for small aircraft with straight baffle seals.

Part Number BAFFLE-KIT-2

- (1) 18 in X 36 in (3 ft) **Cowl Saver™**
(Part number CS085X18X36G)
- (2) Baffle Seal Rivet Kit
(Part number RIVET-KIT-2)
- (10) Baffle Seal Retainer Strips
(Part number 6036)

*Recommended for most aircraft.
Allows fabrication of straight, curved or irregular shaped baffle seals.*

Part Number BAFFLE-KIT-3

- (1) 3 in X 156 (13 ft) in **Cowl Saver™**
(Part number CS085X3X156G)
- (1) Baffle Seal Rivet Kit
(Part number RIVET-KIT-2)
- (7) Baffle Seal Retainer Strips
(Part number 6036)

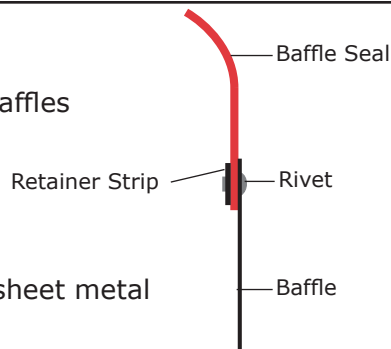

Best for aircraft with straight baffle seals.

Baffle Seal Retainer Strip

Part Number 6036

Use as a retainer for riveting baffle seals to baffles

- 7/16 inch X 2 foot strips - cut to desired length during installation
- .050 inch thick 6061-T6 aluminum
- Corrosion resistant
- Clamps better than washers or light gauge sheet metal
- Economical

Baffle Seal Rivet Kit

Part Number RIVET-KIT-2

- Soft rivets that won't deform baffles
- Several sizes for various baffle thicknesses and hole sizes

Kit contains:
Approximately
Qty. Rivet
