Corrosion Protection

All Beechcraft cables are made from galvanized steel cable and coated with MIL-PRF-16173. This is the same process used on Beechcraft original cables. It provides additional corrosion protection beyond the standard MIL-SPEC rust preventive oil. This provides both exceptional wear resistance and corrosion protection for many years.

MC6057 Cable Stop

- Improved for more consistent holding strength.
- Used on the assist step cable on 35, A35 and C35 Beech Bonanzas.
- One McFarlane MC6057 cable stop replaces both Beechcraft 35-524287 nut and 35-524288 screw part numbers.
- Also included on select cable assemblies as required.
