

## Fuel Strainer Parts for Cessna Aircraft

McFarlane can replace your fuel system parts with high quality McFarlane manufactured parts. Now offering fuel bowls, fuel bowl washers, fuel bowl nuts, standpipes, plungers, stainless steel washers for your plunger, and the fuel strainer seal kit. Buy any of these components separately or as convenient kits.

- Improved safety
- More reliable
- Longer life
- Less money

### Maintenance Tip:

*Cleaning the Fuel Screen - The fuel screen is removed by removing the standpipe. The rubber tipped plunger must be unseated before the standpipe is loosened. Failure to lift the plunger off of its standpipe seat can damage the plunger. Pull the strainer drain knob as if you were draining the fuel bowl. Block or clamp the knob in this position. Insert a smooth round tool such as a screw driver or punch in the standpipe cross-hole and un-screw the standpipe.*

### Fuel Bowl MC0756008-1

- Computer machined (not die cast).
- Gold anodized for additional corrosion resistance.
- This bowl is engineered to last!

### Fuel Strainer Standpipe MC0756011-1

- Stainless steel
- Costs less
- No more corrosion pits
- No more stripped threads
- The last one you will buy!

### Fuel Strainer Plunger MC0756010-11

- Special electro polished shaft for longer o-ring life
- McFarlane's Vulcanize bonded blue Viton® rubber tip outlasts the original in any fuel.

### Fuel Strainer Seal Kit FS-KT-1

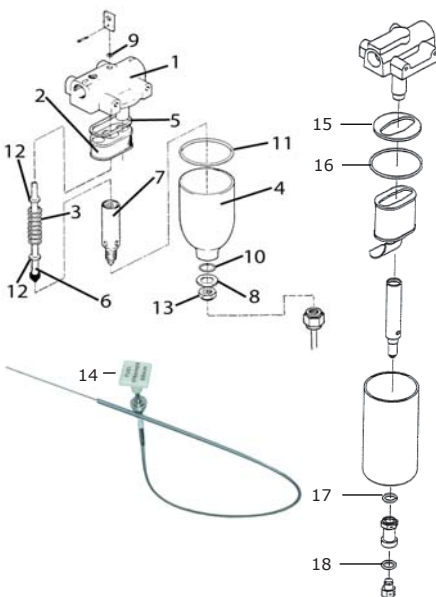

Only McFarlane has approval to replace the old less fuel resistant o-rings with the latest fuel-proof fluoro-carbon o-ring.
